

SEESCO received a Heater Unit order from Taikisha for Beijing Hyundai Motor #4 paint shop.

On Aug.08.2015, SEESCO received a purchase order from Taikisha for supplying of total 33 sets Heater Units to be installed at Beijing Hyundai Motor #4 paint shop.

In-direct fired Heater Unit with Heat Exchanger	23 sets
Direct fired Heater Unit	3 sets
Fresh make up air heater	5 sets
Direct fired Heater Unit for Radiation oven	2 sets

Unlikely to others, most of SEESCO Heater Unit is specially designed to be shipped in the standard container to save packing and shipping cost.

Heater Unit will be supplied as a complete package which is consist of Combustion chamber, Burner, Gas valve train, R/C fan, Heat exchanger and Burner control panel. All Heater Unit will be live fire tested at SEESCO factory with running of R/C fan before deliver to customer to make sure trouble free operation at site.

Complete package assembling of Heater Unit and live fire test at the SEESCO factory will be key advantage of SEESCO system than others..

Advantage and Feature of SEESCO Heater Unit.

- As SEESCO design and manufacture Heater Unit completely, oven builder can save design and engineering manpower.
- As Heater Unit is supplied as a complete package, customer can save separate export packing cost of Burner, Gas valve train, Heat exchanger and R/C fan.
- As Heater Unit is supplied as a complete package, customer can save separate shipping cost of Burner, Gas valve train, Heat exchanger and R/C fan.
- As SEESCO design the Heater unit to be shipped in the standard container, shipping cost itself is cheaper than shipping by flat rack.
- Customer can save site installation cost of Heater unit, R/C fan, Burner, Gas valve train, Heat exchanger and Burner control panel.
- Customer can save local electric wiring and local gas piping cost.
- Customer can save separate supervision cost of R/C Fan.
- As all the Heater Unit will be live fire tested at the SEESCO shop, customer can save cost of supervision and start up commissioning of burner system.

At the same time,

- Customer can be guaranteed high quality and performance from SEESCO.
 - Possible mistake at site can be eliminated by live fire test at the shop.
 - Customer can save construction time of plant.
 - Customer can get after service from a single reliable source SEESCO.
 - Customer can expect long life and less maintenance of Heater Unit.
-

High performance MAXON OVENPAK burner system and gas valve train system will be supplied to meet NFPA and local regulation.

For In-direct fired heater unit, 90% efficiency SEESCO "Super Saver 90" Heat exchanger will be equipped.

By the "Super Saver 90" high efficiency heat exchanger, it is estimated to save fuel gas up to 20% than conventional heat exchanger.

Special heat exchanger protection program will be utilized for the control panel that it will pro-long the life time of heat exchanger.

SEESCO "Super Save 90" 90% efficiency Heat Exchanger

We SEESCO thanks so much to Hyundai Motor company and Taikisha for SEESCO to supply Heater Units to Beijing Hyundai Motor #4 new paint shop plant. We hope Hyundai Motor company and Taikisha will satisfy to our quality and performance of supply and service.

Our aim is to be the best supplier of Heater Unit in the world.

Thank You.
